

Compatibilitate soluții Kwazar WTV.1196 Acid Line
10% ammonia
10% ammonium chloride
10% hydrogen peroxide
20% citric acid
20% Hydrochloric acid
20% Hydrofluoric acid
20% Nitric acid
20% orthophosphoric acid
20% perchloric acid
20% Sulfuric acid
2-propanol
9.6% sodium hypochlorite
96% ethanol
Ammonium carbonate solution
Ammonium fluoride
Ammonium nitrate solution
Ammonium sulphate solution
Baking soda solution
Barium hydroxide solution
Borax solution
Butylene glycol
Calcium chloride solution
Calcium hydroxide solution
Calcium nitrate solution
Copper chloride solution
Copper fluoride
Copper nitrate solution
Copper sulfate solution
Dextrin solution
Diethylene glycol
Dipentene (Limonene)
Ethylene glycol
Fragrance oils (e.g. lavender, pine)
Glucose solution
Glycerol solution
Glycolic acid
Lactic acid

Lead nitrate solution
Lithium bromide solution
Lithium chloride solution
Magnesium chloride solution
Magnesium sulfate solution
Nickel chloride solution
Nickel sulfate solution
Potassium bisulphate solution
Potassium borate solution
Potassium bromide solution
Potassium carbonate solution
Potassium chlorate solution
Potassium chloride solution
Potassium iodide solution
Potassium nitrate solution
Potassium perchlorate
Potassium permanganate
Potassium sulphate solution
Propylene glycol
Salicylic acid
Sea water
Silicone oil
Silver nitrate solution
Sodium benzoate
Sodium carbonate (technical,solution)
Sodium chlorate solution
Sodium chloride solution
Sodium nitrate solution
Sodium sulfate solution
Stearic acid
surfactants
Urea solution
