

Compatibilitate soluții Kwazar WTV.1197
10% ammonia
10% ammonium chloride
10% hydrogen peroxide
20% citric acid
9.6% sodium hypochlorite
Ammonium carbonate solution
Ammonium fluoride
Ammonium nitrate solution
Ammonium sulphate solution
Baking soda solution
Barium hydroxide solution
Borax solution
Butylene glycol
Calcium chloride solution
Calcium nitrate solution
Copper chloride solution
Copper fluoride
Copper nitrate solution
Copper sulfate solution
Crude oil
cyclohexane
Dextrin solution
Diesel
Diethylene glycol
Dipentene (Limonene)
Engine oil
Ethylene glycol
Extract gasoline
Fragrance oils (e.g. lavender, pine)
Glucose solution
Glycerol solution
Glycolic acid
heptane
isooctane
Lactic acid
Lead nitrate solution
Lithium bromide solution

Lithium chloride solution
Magnesium chloride solution
Magnesium sulfate solution
Mineral machine oil
Mineral oil
Nickel chloride solution
Nickel sulfate solution
Paraffin oil
Petroleum
Potassium bisulphate solution
Potassium borate solution
Potassium bromide solution
Potassium carbonate solution
Potassium chlorate solution
Potassium chloride solution
Potassium iodide solution
Potassium nitrate solution
Potassium perchlorate
Potassium permanganate
Potassium sulphate solution
Propylene glycol
Salicylic acid
Sea water
Silicone oil
Silver nitrate solution
Sodium benzoate
Sodium carbonate (technical,solution)
Sodium chlorate solution
Sodium chloride solution
Sodium nitrate solution
Sodium sulfate solution
Stearic acid
surfactants
tetrachlorethylene
Transformer oil
Urea solution
Vaseline oil
White spirit
